PROFILE

Unity Developer with hands-on experience in building real-time 3D interactive applications and VR simulations using Unity and C#. Skilled in designing gameplay systems, implementing mechanics, optimizing performance, and debugging complex interactions.

Strong foundation in object-oriented programming and rapid prototyping. Passionate about transitioning into game development and building scalable, high-performance interactive experiences. Currently expanding skills in JavaScript and backend integration.

PROFESSIONAL EXPERIENCE

Epicx Studios Pvt Ltd, Unity Developer / XR Developer

May 2024 – Present | Bengaluru, India

- Developed real-time 3D interactive systems and VR training simulations using Unity and C#
- Designed and implemented complex interaction mechanics involving constrained rotations, physics-based behavior, and user feedback systems
- Optimized performance for smooth runtime experience across VR devices
- Debugged and resolved interaction and system-level issues in production environments
- Collaborated with cross-functional teams to deliver immersive and functional simulations

EduBridge Learning Pvt Ltd, Java Trainee

February 2024 – July 2024 | Bengaluru, India

- Built foundational knowledge in Java, OOP, and backend development concepts
- Developed full-stack application using Spring and Angular

Enthu Technology Solutions India Pvt Ltd, Internship Trainee

September 2022 – October 2022 | Bengaluru, India

- Worked on IoT-based systems involving sensor data collection and device communication
- Gained hands-on exposure to real-time data handling and hardware-software interaction
- Assisted in debugging and testing embedded system workflows

PROJECTS

VR Molecular Chemistry Lab , Unity Demo XR Project

- Developed a VR simulation for interactive atom manipulation and real-time molecule formation
- Implemented proximity-based bonding system and ScriptableObject-driven molecule validation
- Designed world-space VR UI for molecule info and built reset & interaction systems
- Optimized physics and stability for smooth XR experience
- Built as a rapid prototype within a **short deadline for an XR technical assessment**

A320 Fuel Pump Interaction, Unity XR Project

- Developed a VR-based fuel pump interaction system with realistic wrench mechanics using UltimateXR
- Implemented torque-based wrench interaction with directional constraints and progressive resistance
- Designed canister slide-out mechanism with constrained translation and snapping behavior
- Built modular interaction logic for precise, real-world simulation accuracy.

A320 Nose Jacking, VR Stimulation

- Developed a real-time VR training simulation replicating aircraft nose jacking procedures using Unity and C#
- Designed and implemented **torque-based mechanical interaction systems** (torque wrench) with directional constraints and realistic ratcheting behavior
- Implemented **physics-driven rotation logic, resistance handling, and interaction feedback systems** (UI, haptics, audio)
- Built **custom interaction mechanics** using UltimateXR framework for accurate real-world simulation behavior
- Optimized performance to ensure smooth interaction across VR devices

A320 Preflight Checklist, VR stimulation

- Developed an interactive VR-based checklist system for aircraft preflight procedures
- Designed intuitive **UI interaction flows** for step-by-step task completion
- Improved usability and responsiveness through optimized interaction handling

Crazy Cube | 2D Demo Arcade Game (Unity, C#)

- Built a **2D obstacle-based arcade game** where players guide a cube to a target while avoiding hazards.

EDUCATION

Bachelor's of Engineering in Computer Science and Engineering, ACS College Of Engineering

August 2019 – June 2023 | Bengaluru, India

Secured 6.83 CGPA.

Intermediate, Seshadripuram Independent PU College

August 2016 – March 2018 | Bengaluru, India

Secured 69 percentage.

Thyagaraju Central School

August 2015 – March 2016 | Bengaluru, India

Secured 8.4 CGPA.

SKILLS

Core:

Unity3D, C#, Game Mechanics, Object-Oriented Programming (OOP)

Development:

Debugging, Performance Optimization, Rapid Prototyping, UI Systems

XR & Tools:

Virtual Reality (VR), XR Interaction Toolkit, UltimateXR, Google AR Core, OpenXR plugin, Oculus Plugin, HTC Vive , Meta Quest, Unity OpenXR: Android XR

Additional:

REST API Integration (Basic), JSON Handling, JavaScript (Basic), Java, RDBMS, Git, Git Hub, Perforce Helix Core(version control)

LANGUAGES

English • Hindi • Kannada

- Developed **core gameplay systems** including movement, collision handling, and level completion logic.
- Implemented **responsive controls and physics-based interactions** using Unity Engine.
- Structured code using **modular C# scripts** for maintainability and scalability.
- Gained hands-on experience in **game design principles, debugging, and gameplay balancing**.

Patient Health Monitoring System

- Highlighted the time delay in cloud solutions, emphasizing the need for fast healthcare monitoring.
- And won the “**BEST PROJECT AWARD-1st Place**” for this project among 30+ projects held by Computer science and Engineering department at “ACS College Of Engineering”.

INTERESTS

Anime, Cricket, Singing, Cooking, Pencil Sketch, Travel, Moto-Riding

AWARDS

Best Project Award, ACS College Of Engineering

27th May 2023

OTHER SKILLS

Communication Skill | Rapid Learner |
Adaptability | Collaboration |
Problem Solving | Flexibility | Leadership

CERTIFICATES

- Java(basic) Certification From HackerRank. [↗](#)
- Introduction to Web Development with HTML, CSS, JavaScript by IBM. [↗](#)
- TCS ion Career Edge - Young Professional by TCS-ion [↗](#)
- Software Intern Certification From HackerRank. [↗](#)
- Java for Beginners - Learn all the Basics of Java from Udemy. [↗](#)
- Certification Program in Java Full Stack Development [↗](#)
